CONTENTS

Volume 28, Issue Nos. 1–15

International Journal for

NUMERICAL AND ANALYTICAL METHODS
IN GEOMECHANICS

Issue No. 1, January 2004

Stochastic computational modelling of highly heterogeneous poroelastic media with long-range correlations: D. G. Frias, M. A. Murad and F. Pereira 1

A three-phase soil model for simulating stress wave propagation due to blast loading: Z. Wang, H. Hao and Y. Lu 33

Analysis of a shield tunnel: W. Q. Ding, Z. Q. Yue, L. G. Tham, H. H. Zhu, C. F. Lee and T. Hashimoto 57

Numerical prediction of blast-induced stress wave from large-scale underground explosion: C. Wu, Y. Lu and H. Hao 93

Issue No. 2, February 2004

Consolidation analysis of a cross-anisotropic homogeneous elastic soil using a finite layer numerical method: G.-X. Mei, J.-H. Yin, J.-M. Zai, Z.-Z. Yin, X.-L. Ding, G. F. Zhu and L.-M. Chu 111

A cyclic viscoelastic-viscoplastic constitutive model for clay and liquefaction analysis of multi-layered ground: F. Oka and Y.-S. Kim 131

Stability analysis of rock slopes with a modified Hoek-Brown failure criterion: X.-L. Yang, L. Li and J.-H. Yin 181

Advective transport from a penny-shaped crack in a porous medium and an associated uniqueness theorem: A. P. S. Selvadurai 191

Issue No. 3, March 2004

Experimental study of thermal effects on the mechanical behaviour of clay: C. Cekerevac and L. Laloui 209

About Darcy's law in non-Galilean frame: C Geindreau, E. Sawicki, J.-L. Auriault and P. Royer 229

Comparison of non-local and polar modelling of softening in hypoplasticity: T. Maier 251

On the evolution of simple shear saturated soils: X. B. Lu, S. Y. Wang and C. Peng . 269

Issue No. 4, 10 April 2004

Strain localization in sand: an overview of the experimental results obtained in Grenoble using stereophotogrammetry: J. Desrues and G. Viggiani 279

A critical state model for sands dependent on stress and density: Y. P. Yao, D. A. Sun and T. Luo 323

Poroplastic modelling of the excavation and ventilation of a deep cavity: D. Hoxha, A. Giraud, A. Blaisonneau, F. Homand and C. Chavant 339

Discussion of Kolymbas and Herle's paper on "Shear and objective stress rates in hypoplasticity": A. Beghini, Z. P. Bažant, R. Chambon, A. Niemunis, D. Kolymbas and I. Herle 365

Issue No. 5, 25 April 2004

Softening, localization and stabilization: capture of discontinuous solutions in J2 plasticity: M. Cervera, M. Chiumenti and C. Agelet de Saracibar 373

The influence of the depth of the ground water table on free field road traffic induced vibrations: M. Schevenels, G. Degrande and G. Lombaert 395

Crack propagation analysis with Galerkin boundary element method: K. Xu, S. T. Lie and Z. Cen 421

Deformations resulting from the movements of a shear or tensile fault in an anisotropic half-space: G. Y. Sheu 437

Issue No. 6, May 2004

Gradient plasticity modelling of strain localization in granular materials: O. Al Hattamleh, B. Muhunthan and H. M. Zbib 465

Fabric evolution during hydromechanical loading of a compacted silt: O. Cuisinier and L. Laloui 483

Experimental study of stick-slip behaviour: F. Adjemian and P. Evesque 501

Plane of elastic non-resisting tension material under foundation structures: A. Baratta and I. Corbi 531

Limit analysis for saturated porous media without fluid flow calculation: A. Corfdir . 543

Issue No. 7–8, June–July 2004

Special Issue:
Computational Mechanics of Concrete and Concrete Structures
Guest Editors: N. Bićanić, R. de Borst, H. Mang and G. Meschke

Preface to Computational Mechanics of Concrete and Concrete Structures: N. Bićanić, R. de Borst, H. Mang and G. Meschke 563

A micromechanical approach to the strength criterion of Drucker-Prager materials reinforced by rigid inclusions: J.-F. Barthélémy and L. Dormieux 565

Discrete *vs* smeared crack models for concrete fracture: bridging the gap: R. de Borst, J. J. C. Remmers, A. Needleman and M.-A. Abellan 583

Continuum approach to the numerical simulation of material failure in concrete: J. Oliver, A. E. Huespe, E. Samaniego and E. W. V. Chaves 609

Non-local damage model with evolving internal length: G. Pijaudier-Cabot, K. Haidar and J.-F. Dubé 633

Size effect on fracture energy induced by non-locality: M. Jirásek, S. Rolshoven and P. Grassl 653

Three-dimensional liquid transport in concrete cracks: J. Carmeliet, J.-F. Delerue, K. Vandersteen and S. Roels 671

Chemo-hygro-mechanical modelling and numerical simulation of concrete deterioration caused by alkali-silica reaction: F. Bangert, D. Kuhl and G. Meschke 689

Gradient enhanced thermo-mechanical damage model for concrete at high temperatures including transient thermal creep: C. J. Pearce, C. V. Nielsen and N. Bićanić 715

Double brittle-to-ductile transition in bending of fibre reinforced concrete beams with rebars: A. Carpinteri, G. Ferro and G. Ventura 737

Modelling the behaviour of RC beams retrofitted with CARDIFRC®: B. L. Karihaloo and F. J. Alaee 757

Optimization of jet-grouted support in NATM tunnelling: C. Pichler, R. Lackner, L. Martak and H. A. Mang 781

Application of a constitutive model for concrete to the analysis of a precast segmental tunnel lining: B. Winkler, G. Hofstetter and H. Lehar 797

Regularized sequentially linear saw-tooth softening model: J. G. Rots and S. Invernizzi 821

Numerical modelling for earthquake engineering: the case of lightly RC structural walls: J. Mazars, F. Ragueneau, G. Casaux, A. Colombo and P. Kotronis 857

Issue No. 9, 10 August 2004

A finite element porothermoelastic model for dual-porosity media: R. Nair, Y. Abousleiman and M. Zaman 875

The probabilistic key-group method: A. R. Yarahmadi Bafghi and T. Verdel 899

An analytical solution of one-dimensional consolidation for soft sensitive soil ground: Y.-M. Chen, X.-W. Tang and J. Wang 919

A three dimensional embedded beam element for reinforced geomaterials: M. Sadek and I. Shahrour 931

On zero-thickness interface elements for diffusion problems: J. M. Segura and I. Carol 947

Time-domain dynamic analysis of dam-reservoir-foundation interaction including the reservoir bottom absorption: S. Küçükarslan 963

Issue No. 10, 25 August 2004

Shear band evolution and accumulated microstructural development in Cosserat media: A. Tordesillas, J. F. Peters and B. S. Gardiner 981

Application of micropolar plasticity to post failure analysis in geomechanics: M. T. Manzari 1011

Steady infiltration from buried point source into heterogeneous cross-anisotropic unsaturated soil: G. J. Chen and D. Gallipoli 1033

Effects of boundary conditions and partial drainage on cyclic simple shear test results – a numerical study: B. Wang, R. Popescu and J. H. Prevost 1057

Issue No. 11, September 2004

A coupled model for solid deformation and gas leak flow: P. Sun and H. Wan . . . 1083

Upscaling of elastic properties for large scale geomechanical simulations: F. Chalon, M. Mainguy, P. Longuemare and P. Lemonnier 1105

Semi-analytical far field model for three-dimensional finite-element analysis: J. P. Doherty and A. J. Deeks 1121

A new displacement back analysis to identify mechanical geo-material parameters based on hybrid intelligent methodology: X.-T. Feng, H. Zhao and S. Li 1141

Model for large strain consolidation with compressible pore fluid: P. J. Fox and T. Qiu 1167

Issue No. 12, October 2004

Modelling poroelastic hollow cylinder experiments with realistic boundary conditions: S. Jourine, P. P. Valkó and A. K. Kronenberg 1189

ParCYCLIC: finite element modelling of earthquake liquefaction response on parallel computers: J. Peng, J. Lu, K. H. Law and A. Elgamal 1207

Stresses due to vertical subsurface loading for an inhomogeneous cross-anisotropic half-space: C.-D. Wang and E. Pan 1233

Statistical analysis of friction sleeve length effects on soil classification: D. R. Saussus, J. D. Frost and J. T. DeJong 1257

Issue No. 13, November 2004

Compaction process in sedimentary basins: the role of stiffness increase and hardening induced by large plastic strains: V. Deudé, L. Dormieux, S. Maghous, J. F. Barthélémy and D. Bernaud 1279

Modelling of earth and water pressure development during diaphragm wall construction in soft clay: R. Schäfer and Th. Triantafyllidis 1305

Three dimensional simulation of fluid flow in X-ray CT images of porous media: A. Al-Omari and E. Masad 1327

Issue No. 14, 10 December 2004

A continuum-discrete hydromechanical analysis of granular deposit liquefaction: M. Zeghal and U. El Shamy 1361

Analysis of soil consolidation by vertical drains with double porosity model: X.-S. Wang and J. J. Jiao 1385

K_0 estimation in level granular soil from anisotropic wave velocities on the basis of micromechanics: Y.-W. Pan and J.-C. Liou 1401

A re-investigation of the low Reynolds number uniform flow past a porous spherical shell: H. J. Hsu, L. H. Huang and P. C. Hsieh 1427

A 3D finite element simulation model for TBM tunnelling in soft ground: T. Kasper and G. Meschke 1441

Issue No. 15, 25 December 2004

A general formulation of hypoplasticity: J. Lanier, D. Caillerie, R. Chambon, G. Viggiani, P. Bésuelle and J. Desrues 1461

An upscaling method and a numerical analysis of swelling/shrinking processes in a compacted bentonite/sand mixture: M. Xie, S. S. Agus, T. Schanz and O. Kolditz . 1479

Generalized strain probing of constitutive models: Y. M. A. Hashash Q. Fu and J. Butkovich 1503

Advanced programming methods and data structures for computational modelling using edge-based finite volume methods: I. Masters, I. Rees and R. W. Lewis . . 1521

An approximate method for evaluating the shear band thickness in saturated soils: X. B. Lu, W. Shuyun, W. Yihua and P. Cui 1533

Reflection and refraction of *SH*-waves at a corrugated interface between two monoclinic elastic half-spaces: J. Kaur and S. K. Tomar 1543

Mechanical behaviour and failure of cohesive granular materials: J.-Y. Delenne, M. S. El Youssoufi, F. Cherblanc and J.-C. Bénet 1577
